

ANNEXURE - IV

M.D.UNIVERSITY, ROHTAK (HARYANA)
SCHEME OF STUDIES & EXAMINATION FOR
MASTER OF ENGINEERING DEGREE COURSE IN
ELECTRONICS & COMMUNICATION
SEMESTER-I

Course No.	Course Title	Teaching Schedule			Marks			Credits			Duration of Exam
		L	T	P	Sessional	Exam	Total	Sessional	Exam	Total	
MEEC-501	Advanced Microprocessor & Micro Controllers	4	-	-	50	100	150	2	4	6	3
MEEC-503	Satellite & Space communication	4	-	-	50	100	150	2	4	6	3
MEEC-505	Information & Communication Theory	4	-	-	50	100	150	2	4	6	3
MEEC-507	Advanced Digital Signal Processing	4	-	-	50	100	150	2	4	6	3
	Elective-1	4	-	-	50	100	150	2	4	6	3
MEEC-517	Satellite Lab	-	-	3	50	50	50	2	2	4	3
MEEC-519	Advanced Microprocessor & Micro Controllers Lab	-	-	3	50	50	50	2	2	4	3
TOTAL		20	-	6	350	600	950	14	24	38	

46. ELECTIVE -1

Advanced Digital Communication Techniques (MEEC-509)

Advance Mathematics for Engineers (MEEC-511)

Computational methods (MEEC-513)

Data Communication Networks (MEEC-515)

NOTE: 1The paper setter shall set each theory paper of 100 marks covering the entire syllabus. However, the examiner shall evaluate the performance of the student in the theory paper finally by assigning one of the grades out of A, A(-), B, B(-), C, C(-), D & F. The Examination of practical courses shall also be evaluated on the basis of three grades.

2. The Sessionals of Theory/Practical Courses shall also be evaluated on the basis of these grades.

3. The choice of students for any elective shall not be binding on the Deptt. to offer it.

4. The Grading System is defined at the end of the Scheme of Studies & Examinations & will be supplied by the Univ. to the examiner(s)

NOTE: 1 Sessionals of Dissertation Course shall be evaluated on the basis of the grades out of A, A(-), B, B(-), C, C(-), D & F.

2. The dissertation shall be evaluated through an exam. by a Committee of Examiners consisting of Head of the Department, Dissertation supervisor & one External Examiner. The evaluation shall be based upon the above grades.

3. *The grading system is defined at the end of the Scheme of Studies & Examination & will be supplied by the Univ. to the examiner(s)*

Master of Engineering Electronics & Communication

(Scheme of Studies & Examination)

M.D. University, Rohtak (Haryana)

MEEC-501 ADVANCED MICROPROCESSOR & MICROCONTROLLERS

L T P	Marks	Credits
4 - -	Exams: 100	4
	Sessionals : 50	2
	Total :150	6
	Duration of Exam.:3 hrs.	

1. Design of basic microprocessor architectural Concepts: Microprocessor architecture, word Lengths, addressable memory, Microprocessor's speed architectural characteristics, registers, instruction, memory addressing architecture, ALU, GPR's Control logic & internal data bus.

2. Microprocessor Instructions & Communication: Instruction Set, Mnemonics, Basic Instruction Types , Addressing modes ,Microprocessor I/O connecting I/O put to Microprocessor ,Polling and Interrupts , Interrupt and DM. Controllers.

3. Microcontroller:Introduction 8051 architecture and programming model. Internal RAM and registers, I/O parts, Interrupt system & Instruction sets.

4. Advanced Microprocessors: Intel X86 family of advanced Microprocessor, programming model for 86 family. X85 addressing modes, instruction set, hardware. Motorola 68 XXX family of microprocessor, 68 XXX addressing modes, instruction set, hardware.

5. Microprocessor I/O: Data Communication, parallel I/O serial communication, Serial interface and UART modems, I/O devices, D/A,A/D interface, special I/O devices.

6. Developing Microprocessor Based Products: Introduction to the Design Process, Preparing the specifications, Developing a design, Implementing and Testing and design, Regulatory Compliance Testing, design tool for Microprocessor Development.

Text Books:

1. C.M. Gilmore, "Microprocessors Principals and Application", MGH
2. Rajkamal, "Embedded System, Architecture & Programming", TMH

Reference Books:

1. Berry B. Berry, " Inter Series of microprocessors", PHI
2. D. V. Hall, " Microprocessor & Interfacing", TMH
3. Peat man, "Microprocessor Based System Design", Pearson

50.

51. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.

3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-503

SATELLITE AND SPACE COMMUNICATION

L T P

4 - -

Marks

Credits

Exams: 100

4

Sessionals : 50

2

Total :150

6

Duration of Exam.:3 hrs.

1. Introduction: Satellite communication, Brief History.

2.Orbits of satellite: Low, medium and Geo synchronous main characteristics, Angle period, Returning period, Angle of Evaluation, Propagation Delay, Orbital Spacing.

3. Satellite Links: Delay transponders, Earth Stations, Antennas and Earth coverage, Altitude and eclipses.

4. Earth space propagation effects: Frequency window, Free space loss, Atmospheric absorption, Rainfall Attenuation, Ionospheric scintillation, Telemetry, Tracking and command of satellites.

5. Detection: QPSK offset QPSK and MSK. Coherent and non-coherent detection, Error rate performance.

6. Synchronization: Principle and techniques, Multiple Access Techniques, FDMA, SPADE system, TDMA system, concept and configuration, system timing frames format, SSMA-Basu Principles, VSAT, Random access, space communication, link design description of operational in TELSAT and INSA T system.

Text Books:

1. J. Martin: Communication Satellite System, PH Englewood.
2. D.C.Aggarwal: Satellite Communication, Khanna Publishers.

Reference Books:

1. Tri Ha Digital Satellite Communication Tata Mc Graw Hill.
2. Harry and Vam Trees: Satellite Communication, IEEE Proceedings, 1979.

52. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.
3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-505

INFORMATION & COMMUNICATION THEORY

L T P

4 - -

Marks

Credits

Exams: 100

4

Sessionals : 50

2

Total :150

6

Duration of Exam.:3 hrs.

1.Information Theory: Concept of Information and Entropy, Shanon's theorems, Channel Capacity Self information, Discrete and Continuous entropy, Mutual and joint information, Redundancy.

2. Coding Theory: Source encoding & channel encoding, Error detection & Correction, Various codes for channel coding, Rate Distortion functions.

3. Codes used in Information Theory: Linear block codes, systematic linear codes& optimum coding for Binary symmetric channel, The Generator & parity check matrices, Syndrome decoding & Symmetric channels, Hamming codes, Weight enumerator, Perfect codes, BCH codes , Idempotent & Mattson Solomon polynomials, Reed Solomon codes, Justeen codes, MDS codes & generalized BCH codes, Convolution codes & Viterbi decoding algorithm.

4. Performance of codes: Performance of linear block codes & convolution codes, code incurable error probability Upper & lower bounds.

Text books:

1. Blahut R.E. , Theory and practice of error control codes, AWL1983.
2. Wilson, Digital Modulation and coding, Pearson

Reference Books:

1. B.P. Lathi, Communication System, Oxford
2. Ranjan Bose, Information Theory, Coding & Cryptography, TMH
3. J. Dass. , S.K. Malik & P.K. Chatterjee, Principles of digitals communication

53. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.
3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-507	ADVANCED DIGITAL SIGNAL PROCESSING	
L T P	Marks	Credits
4 - -	Exams: 100	4
	Sessionals : 50	2
	Total :150	6
	Duration of Exam.:3 hrs.	

1. Introduction of DSP: Introduction to Signal Processing, Discrete Linear Systems, superposition Principle, Unit-Sample response, stability & causality Criterion.

2. Fourier Transform & inverse Fourier transform: Frequency domain design of digital filters, Fourier transform, use of Fourier transform in Signal processing. The inverse fourier transform, Sampling continuous function to generate a sequence, Reconstruction of continuous -time signals from Discrete-time sequences.

3. DFT & FFT & Z transform with Applications: Discrete Fourier transform, properties of DFT, Circular Convolution, Fast Fourier Transform, Realizations of DFT. The Z-transform, the system function of a digital filter, Digital Filter implementation from the system function, the inverse Z-transform, properties & applications, Special computation of finite sequences, sequence of infinite length & continuous time signals, computation of fourier series & time sequences from spectra.

4. Digital Filter Structure & Implementation: Linearity, time- invariance & causality, the discrete convolution, the transfer function, stability tests, steady state response, Amplitude & Phase characteristics, stabilization procedure, Ideal LP Filter, Physical reliability & specifications.FIR Filters, Truncation windowing & Delays, design example, IIR Filters: Review of design of analog filters & analog frequency transformation. Digital frequency transformation. Design of LP filters using impulse invariance method, Bilinear transformation, Phase equalizer, digital all pass filters.

5. Implementation of Filters: Realization block diagrams, Cascade & parallel realization, effect of infinite-word length, transfer function of degree 1&2, Sensitivity comparisons, effects of finite precision arithmetic on Digital filters.

Text Books

1. Alam V. Oppenheim & Ronald W. Schafer, "Digital Signal Processing" PHI.
2. JG Proakis, "Digital Signal Processing", (PHI) 3rd Edition.

Reference Books

1. Rabiner & Gold, "Theory & application of digital Signal Processing", PHI 1992.
2. Roman kuc, "Introduction to Digital Signal Processing," McGraw hill Edition.

54. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.
3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-509 ADVANCED DIGITAL COMMUNICATION TECHNIQUES

L T P	Marks	Credits
4 - -	Exams: 100	4
	Sessionals : 50	2
	Total :150	6
Duration of Exam.:3 hrs.		

1. Vector quantization, sub band coding of speech, audio and video signals, linear predictive coding of speech, CELP coders, and MPEG standards for audio and video.
2. Characterization of band pass signals, and systems, ortho-normal expansion of signals, representation of digitally modulated signals, non-linear modulation methods, with memory. Optimum demodulation for known signals in additive Gaussian noise.
3. Probability of error for binary and M-ary signaling, DPSK demodulator, carrier and symbol synchronization techniques, characterization of band limited channels and ISI, signal design for zero ISI, and controlled ISI, optimum demodulator, for ISI and AWGN.
4. Linear equalization and decision feedback, equalization, adaptive equalizer, fading dispersion channels, and tapped delay line model optimum demodulation for binary signals over fading dispersive channels, RAKE receiver.

Text Books:

1. Proakis, J.G, "Digital Communication", McGraw Hill 1995
2. Haykin, S., "Digital Communication", Wiley.

Reference Books:

1. Bhattachary, "Digital Communication Electrical & Electronic Series", TMH
2. Couch, "Digital & Analog Communication System", Pearson

55. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.
3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-511**ADVANCED MATHEMATICS FOR ENGINEERS**

L T P

4 - -

Marks

Credits

Exams: 100

4

Sessionals : 50

2

Total :150

6

Duration of Exam.:3 hrs.

1. Fourier Transforms: Introduction, Fourier Integral Theorem, Fourier Sine and Cosine Integral, Complex form of Fourier Integrals, Fourier Transforms, Inverse Fourier Transform, Properties, Modulation Theorem, Convolution Theorem for Fourier Transforms, Parseval's Identity, Fourier Transforms of derivative of functions, Relation between Fourier and Laplace transform.

2. Z –Transform: Introduction, Properties of Z- Transform, Evaluation of inverse Z – Transform.

3. Matrices And Linear System Of Equations: Solution of linear simultaneous equations by Gaussian elimination and its modification, Crout's triangularization method, Iterative methods-Jacobins method, Gauss-Seidal method, Determination of Eigen values by iteration.

4. Conformal Mapping: Conformal mapping, linear transformations, Bi-linear transformations, Schwarz's-Christoffel transformations.

5. Calculus Of Variations: Euler-Lagrange's differential equation, The Brachistochrone problems and other applications. Isoperi-metric problem, Hamilton's Principle and Lagrange's Equation. Rayleigh-Ritz method, Galerkin method.

Text Book:

1. Dr. B.S. Grewal; "Higher Engineering Mathematics", Khanna Publishers
2. Churchill, "Fourier Series and Boundary Values Problems", McGraw Hill.
3. Galfand & Fomin, "Calculus of Variations", Prentice Hall.

Reference Books:

1. Churchill, "Complex Variables & Applications", McGraw Hill.
2. Elsgole, "Calculus of Variations", Addison Wesley.
3. I.N. Sneddon. The Use of Integral Transforms", Tata McGraw Hill.

56. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.
3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-513**COMPUTATIONAL METHODS**

L T P

4 - -

Marks

Credits

Exams: 100

4

Sessionals : 50

2

Total :150

6

Duration of Exam.:3 hrs.

1. Computational complexity, Error analysis in science and engineering, Fourier series, Fourier Integral, example of transforms' and orthogonal polynomials, Time series calculation of power spectra, convolution and correlation using FETs, introduction to wavelets.
2. Evaluation of integrals, Elementary Analytical methods, Trapezoidal and Simpson's rules, Summation of series, Gaussian Quadrature and orthogonal 1 polynomials, Multidimensional integrals.
3. Ordinary differential equations, solution in closed form, Power series methods, approximate methods, Predictor and corrector methods, Numerical differentiation, and estimation of errors, extermination of functions, optimization and simple search, simplex method of Nelder and Mend, Gradient based method, Finite elements method.
4. Vectors and. matrices, solution of .linear and algebraic equations by direct and interactive methods, Gaussian elimination , minimal residual and conjugate gradient methods, preconditioning techniques.

Text Books:

1. Kreyszig F: Advanced Engineering Mathematics, John Wiley seventh ed 1993.
2. Dr. B.S. Grewal, "Numerical Methods in Engg. & science", Khanna Publisher

Reference Books:

1. Gerald/ Wheatley: Applied Numerical Analysis, Pearson Education Asia, 2002.
2. S.S Sastry, "Introduction methods of Numerical analysis", PHI
3. J.B. Scarborough, Numerical Mathematical Analysis, oxford
4. M.K. Jain, "Numerical Solution of differential Equations", Wiley Eastern

57. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.
3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-515

DATA COMMUNICATION NETWORKS

L T P

4 - -

Marks

Credits

Exams: 100

4

Sessionals : 50

2

Total :150

6

Duration of Exam.:3 hrs.

1. Introduction to Data Transmission: **Overview of Data Communication and networking, Analog And Digital Data Transmission, Transmission Impairments, Various Transmission Media, Data Encoding.**

2. *Digital Data Communication Techniques: Asynchronous And Synchronous Transmission, Error Detection and correction techniques, Physical interfaces*

3. *Data Link Control: Link Configurations, Protocol principles (Error control, Flow control), Bit Oriented and character oriented protocol, Data link layer services, Link Control.*

4. Multiplexing: F.D.M. Synchronous TDM, Statistical TDM

5. Communication Networking Techniques: Communication Networks, Circuit Switching, Message Switching, Packet Switching, Local Networking Technology, The bus / tree topology, the ring topology, Medium Access control protocols (CSMA/CD, Token ring, FDDI, DQDB).

6. *Computer Communication Architecture: OSI and TCP/IP Model, Protocol And Architecture, Networking Access protocols, Inter Networking, Transport layer Protocols, Session Service And Protocols, and Presentation/Application protocols*

7. *ISDN Networks: Concepts & Architecture, Protocols*

Text Books:

1. William Stallings, "Data and Computer Communication", PHI, 4th Ed.

2. Forouzan, "Data communications and networking", TMH

Reference Books:

1. Andrew Tanenbaum, "Computer Networking", PHI

2 Godbole, "Data communications and network", TMH

58. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.

3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-517

L T P

- - 3

SATELLITE LAB

Marks

Credits

Exams: 50

2

Sessionals : 50

2

Total :100

4

Duration of Exam.:3 hrs.

(A few experiments may be designed & included in this list depending upon the infrastructure available in the institute)

1. To Study the process of Transmitting Signal.
2. To Study the Base band Signal in a Satellite Link.
3. To estimate C/N Ratio.
4. To estimate S/N Ratio.
5. To setup digital satellite Communication Link.
6. To Study Black & White and Color T.V.
7. To plot radiation pattern of parabolic reflector.
8. To Study Satellite Communication Receiver.
9. To set up a PC to PC Sat. Com.Link using RS –232 port.
10. To measure the propagation delay of signal in a Sat.Com. Link.
11. To transmit & receive the function generator waveform through a Sat.Com. Link.
12. To set up a active & passive satellite communication link & study their difference.

NOTE: The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner.

A-PDF Split DEMO

MEEC-519 ADVANCED MICROPROCESSOR & MICROCONTROLLER LAB

L T P

- - 3

Marks

Credits

Exams: 50

2

Sessionals : 50

2

Total :100

4

Duration of Exam.:3 hrs.

(A few experiments may be designed & included in this list depending upon the infrastructure available in the institute)

1. To study the architecture of 8086 Kit
2. Write an ALP to convert a hexadecimal No. to decimal No. in single step execution (DEBUG)
3. Write an ALP to enter a word from keyboard and to display
4. Write an ALP for addition of two one digit Numbers.
5. Write an ALP to display a string
6. Write an ALP reverse a string
7. Write an ALP to check whether the No. is Palindrome
8. To study the Microcontroller Kit
9. Write an ALP to generate 10 KHz frequency square wave
10. Write an ALP to generate 10 KHz & 100KHz frequency using interrupt
11. Write an ALP to interface intelligent LCD display
12. Write an ALP to interface intelligent LED display
13. Write an ALP to Switch ON alarm when Microcontroller receive interrupt
14. Write an ALP to interface one microcontroller with other using serial / parallel communication.

NOTE: The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner.

MEEC-502

ELECTRONICS SYSTEM DESIGN

L T P

4 - -

Marks

Credits

Exams: 100

4

Sessionals : 50

2

Total :150

6

Duration of Exam.:3 hrs.

1. Review of Digital Electronics concept

2. MSI and LSI Circuits And Their Applications: Arithmetic Circuits, Comparators, Multiplexers, Code Converters, XOR And AND-OR INVERTER Gates, Wired Logic, Bus Oriented Structures, Tri-State Bus System, Propagation Delay.

3. Sequential Machines: The Concept Of Memory, The Binary Cell, The Cell And The Bouncing Switch, Set / Reset, D, Clocked T, Clocked JK Flip Flop, Design Of Clock F/F, Conversion, Clocking Aspects, Clock Skew, State Diagram Synchronous Analysis Process, Design Steps For Traditional Synchronous Sequential Circuits, State Reduction, Design Steps For Next State Decoders, Design Of Out Put Decoders, Counters, Shift Registers and Memory.

4. Multi Input System Controller Design: System Controllers, Design Phases And System Documentation, Defining The System, Timing And Frequency Considerations, Functional, Position And Detailed Flow Diagram Development, MDS Diagram, Generation, Synchronizing Two System And Choosing Controller, Architecture, State Assignment, Next State Decoders And Its Maps, Output Decoders, Clock And Power Supply Requirements, MSI Decoders, Multiplexers In System Controllers, Indirect Addressed Multiplexers Configurations, Programmable System Controllers, ROM, PLA And PAL Based Design. Introduction to the CPLD & FPGA.

5. Asynchronous Finite State Machines: Scope, Asynchronous Analysis, Design Of Asynchronous Machines, Cycle And Races, Plotting And Reading The Excitation Map, Hazards, Essential Hazards Map Entered Variable, MEV Approaches To Asynchronous Design, Hazards In Circuit Developed By MEV Method.

Text Books:

1. Fletcher, "An Engineering Approach to Digital Design" PHI 1990
2. Z. Kohavi, "Switching and Finite Automata Theory", TMH

Reference Books

1. Markovitz, "Introduction to Logic Design", TMH
2. Mano, "Digital Design", PHI

59.

NOTE: 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.
3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-504**OPTICAL COMMUNICATION**

L T P

4 - -

Marks

Credits

Exams: 100

4

Sessionals : 50

2

Total :150

6

Duration of Exam.:3 hrs.

1. Introduction: Advantage of optical fiber communication, Elements of fiber communication link, Ray theory and electromagnetic mode theory for optical propagation, step index and graded index fibers, Numerical Aperture.

2. Optical fibers, Losses & Dispersion: Attenuation, Absorption, Linear and non-linear scattering losses, Dispersion, overall fiber dispersion, polarization, fiber bending losses, multimode step index and graded index fibers, single mode fiber, plastic clad and all- plastic fibers, optical fiber cables, dispersion shifted and dispersion flattened fibers, practical fiber profiles.

3. Optical Sources: Basic concepts: LED for Optical Communication, Burrus type double hetero-structure, Surface emitting LEDs, Shape geometry, Edge emitting LEDs, LED to fiber launch systems semiconductor Lasers Theory, modulation and characteristics, Fabry-Perot lasers quantum well lasers and distributed feedback lasers.

4. Photo Detectors: P.I.N Photo Diodes: Theory and their characteristics, Avalanche photo diode detectors, Theory and their band width noise in APD.

5. Optical fiber communication System: Optical transmitter circuit : LED and laser drive circuits, optical receiver circuit; Structure, Pre amplifier, AGC, Equalization, Optical power budgeting line loading , analog systems : analog modulation , direct modulation , sub carrier modulation , distribution system, Optical TDM sub-carrier multiplexing ,WDM .

6. Coherent Systems :Coherent receiver, Homodyne and heterodyne detection, noise in coherent receiver, polarization control, Homodyne receiver , Reusability and laser line-width, heterodyne receiver , synchronous, Asynchronous and self synchronous demodulation, phase diversity receivers.

Text books :

1. John Gowar, "Optical Communication Systems", PHI.
2. Gerd Keiser, "Optical Fiber Communication", TMH

Reference Books:

1. Franz JH & Jain VK, "Optical Communication", Narosa Publns
2. John M. Senior, "Optical Communication", PHI

60.

NOTE: 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.
3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

Credits

Exams: 100

4

Sessionals : 50

2

Total :150

6

Duration of Exam.:3 hrs.

1. Review of MOS technology: Basic MOS Transistors, Enhancement and Depletion mode transistors, N MOS and C MOS process, thermal aspects of processing, Production of masks.

2. Electrical properties of MOS circuit : Parameters of MOS transistors, pass transistors, N MOS inverter, Pull-up to pull down ratio for an N MOS inverter, C MOS inverters, MOS transistor circuit model, Latch up on C MOS circuits.

3. Design processes : MOS Layers, stick diagrams, Design rules, AWA OX C MOS process description, double metal single poly silicon, C MOS process.

4. Basic circuit concepts: Sheets resistance, area capacitance, delay unit, inverter delay, super buffers, propagation delays.

5. Subsystem Design & Layout : Architectural issues in VLSI, switch logic, gate logic, Examples of Combinational logic, Clocked sequential circuits, other system consideration.

6. Scaling of MOS circuits : Scaling factor, limitations, scaling of wires and interconnection, PLA and Finite state Machines.

7. Design Examples : Design of an ALU subsystems, carry look ahead address, parallel.

Text Books:

1. Pucknell D. A. and Eshrachain K, "Basic VLSI Design System & Circuits". (PHI), 1988.
2. Geiger, Rr, Allen P. E. Strader N. R., "VLSI Design Techniques for Analog and Digital Circuit", MGH1990

Reference Books:

1. Wolf, "Modern VLSI Design", Pearson
2. SZE, "VLSI Technology", TMH

61. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.

3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-508**WIRELESS MOBILE COMMUNICATION**

L	T	P	Marks	Credits
4	-	-	Exams: 100	4
			Sessionals : 50	2
			Total :150	6

Duration of Exam.:3 hrs.

1. Introduction to mobile radio systems: Paging systems, cordless telephone system, Cellular telephone systems- Cellular concept, frequency reuse, channel assignment strategies, Interference and system capacity, trunking and grade of service, cell splitting, sectoring, microcell zone concept, HO strategies.

2. Mobile radio propagation: mechanism, free space path loss, log-distance path loss models, Okumara model, Hata model, PCS model, Wideband PCS microcell model, indoor propagation models, Jake's channel model, Multi path characteristics of radio waves, signal fading, Time dispersion, Doppler spread, coherence time LCR, fading statistics, diversity techniques

3. Introduction to spread spectrum communication, multiple access techniques used in mobile wireless communication: FDMA/TDMA/CDMA, Cellular CDMA, packet radio protocols, CSMA, reservation protocols, capacity of cellular CDMA, soft HO

4. Wireless systems and standards: GSM standards, signaling and call control, mobility management, location tracing, wireless data networking, packet error modeling on fading channels, Performance analysis of link and transport layer protocols over wireless channels, mobile data networking (mobile IP), wireless data services, IS-95, GPRS

Text Books:

1. T. S. Rappaport, "wireless Communications: Principles and practices", PHI 1996.
2. William C. Y. Lee, " Mobile Cellular Telecommunications, Analog and Digital Systems", 2nd ed, MGH-1995.

Reference Books:

1. Kaveh Pahlavan & Allen H. Levesque, "Wireless Information Networks", Wiley series in Telecommunications and signal processing.
2. Kamilo Feher: Wireless Digital communications, Modulation and Spread Spectrum Applications PHI 2001.

62. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.
3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-510**RELIABILITY ENGINEERING**

L T P

4 - -

Marks

Credits

Exams: 100

4

Sessionals : 50

2

Total :150

6

Duration of Exam.:3 hrs.

1. Introduction: Definition for Reliability, Need for reliability engineering, Causes of failures, catastrophic failures and degradation failures. Characteristic types of failures, useful life of components, Exponential case of chance failures, Reliability measures, Derivation for exponential distribution function, other kinds of distributions, Binomial, Poisson uniform, Rayleigh, Weibull, Gamma distributions, Markov chains, failures data analysis.

2. Reliability in Systems: Reliability Block Diagrams, series systems, parallel systems, K-out of - M systems, Open and short circuit failures, standby systems. Reliability Analysis of Non-series Parallel system, Boolean Algebra Method, Cut-set approach, delta star method, logical signal relation method, Bayes Theorem Method.

3. Reliability Prediction: Objective of reliability Prediction, Classification, information sources for failure rate data, prediction methodologies, general requirement, role and limitations of reliability prediction.

4. Reliability Allocation: Subsystems reliability improvement, Apportionment for new units, criticality.

5. Redundancy Techniques for reliability: Forms of maintenance, measures of maintainability and availability, maintainability function, availability function, two unit parallel system with repair, Markov model for two unit systems, preventive maintenance, provisioning of spares.

6. Reliability Testing: Kinds of testing, component reliability measurements parametric methods, confidence limits, accelerate testing, equipment acceptance testing.

7. Economics of Reliability Engineering: Reliability cost, effect of reliability on cost. Reliability achievement cost models, reliability utility cost models, replacement policies.

8. Integrated performance measures for communication systems: Integration of reliability and capacity, Delay related reliability.

Text Books:

1. KK Aggarwal, "Reliability Engineering", Kluwer Academic Netherlands.
2. B Singh, "Quality Control and Reliability Analysis", Khanna Publishers.

Reference Books

1. KB Mishra: Reliability Prediction & Analysis: A Methodology oriented treatment, Elsevier, Netherlands
2. Ebeling, "Introduction to Reliability & Maintainability", TMH

63. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.

3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

SWITCHING SYSTEMS

L T P

4 - -

Marks

Credits

Exams: 100

4

Sessionals : 50

2

Total :150

6

Duration of Exam.:3 hrs.

1. Introduction: Basic line circuits in telephony and telegraphy; long-haul communication circuits; statistical bandwidth sharing, principles of traffic switching, & signaling: schemes, CCS7.

2. Review of Switching System: Strowger's and crossbar switches; switching system hierarchy, SPC switching, basic call processing, Level 1, 2 & 3 controls, interface controller, network control processor, central processor, switching fabric-SDS, TDS, STS, TST, TTT, single stage and multi-stage switching network, principles of large-scale, switch design.

3. Traffic Engineering and Tele-traffic Theory: Markov processes representing traffic. Calculation of blocking probability, stationary probability measures for Ergodic Markov processes. Combinatorial interpretation, calculation of blocking probability.

4. Switching Network Control and management: Data networks and protocols, ISDN. Message handling systems/intelligent networks, multi service broadband switching fabrics- ATM., current trends in digital switching systems.

Text Books:

1. Thiagarajan Viswanathan, "Telecommunication Switching Systems and Networks", PHI
2. Syed Riffat Ali, "Digital switching Systems, system reliability and analysis", Tata MC Graw, 2002.

Reference Books:

1. Keshav S, "An Engineering Approach to Computer Network Networking", Addison Wesley, 1998.
2. Martin, "Telecommunication & Computer 3e", PHI

64. **NOTE:** 1 In the semester exam., the examiner will set 8 questions in all covering the entire syllabus. Students will be required to attempt any five questions.

2. Use of scientific calculator will be allowed in the exam. However, Pager, Programmable Calculator & Cellular phone etc. will not be allowed.
3. The scheme of awarding the grades to a student in the course will be supplied by the University to the examiner of answer books.

MEEC-514**MULTIMEDIA SYSTEMS**

L	T	P	Marks	Credits
4	-	-	Exams: 100	4
			Sessionals : 50	2
			Total :150	6

Duration of Exam.:3 hrs.

1. Introduction: Concept of Multimedia, Emerging Applications, Multimedia Systems and Appliances. Distributed Multimedia Systems, Synchronization, Orchestration and QOS Architecture standards.

2. Digital audio representation and processing: Audio in computer applications, its digital representation, transmission and digital processing, speech recognition and generation.

3. Digital video and image compression: Video compression techniques and standardization of algorithms, JPEG, MPEG, DVI technology.

4. Multimedia Information Systems: Workstation OS, New OS support, Real Time Mach, Multimedia system service architecture, Media Stream Protocol, service and window system, client control of continuous media, Hyper applications. Multimedia Information systems, File system support, Data Models.

5. Multimedia communication systems: Public Network services and N/W Protocols, Quick time Movie File (QMF), format, OMFI, MHEG, Format function Real time Interchange, Track Model and Object Model Teleconferencing systems, Shared Application Architectures, Embedded Distributed objects, Multimedia conferencing architecture, architecture of team workstation.

6. Multimedia and Internet: The internet, client server technology, Communication Protocols, Internet Addressing, WWW, HTML, and Web Authorizing, Web page browsers and development, bandwidth and applications considerations, Design Considerations for Web pages, Accessing Content on internet

Text Books:

1. John F. Koegel Bufod, "Multimedia Systems", Addison Wesley, Edition. 2000
2. David Hillman, "Multimedia Technology and Application", Galgotia Publication – Edition 1998.

Reference Books:

1. Fred Halsall, "Multimedia Communications", Pearson
2. Rao, Bojkovic & Milovanovic, "Multimedia Comm. System: Technology, Std. & Network", PHI

A-PDF Split DEMO

- - 4

Sessionals : 100 4
Total :100 4

Every student will carry out dissertation under the supervision of a Supervisor(s). The topic shall be approved by a Committee constituted by the Head of the concerned Deptt.

Every student will be required to present two seminar talks, first at the beginning of the Dissertation (Phase-I) to present the scope of the work and to finalize the topic, and second towards the end of the semester, presenting the work carried out by him/her in the semester. The committee constituted will screen both the presentations so as to award the sessional grades out of A, A(-), B, B(-), C, C(-), D & F. A student scoring 'F' grade shall have to improve this grade before continuing his/her Dissertation in the 4th semester failing which he/she shall have to repeat the Dissertation (Phase-I) next time in the regular 3rd semester.

MEEC-602

L T P
- - 20

DISSERTATION

	Marks	Credit
Sessionals	: 150	6
Practical Exam	: 600	24

Total : 750 30
Duration of Exam: 3 Hrs

The Dissertation Phase-1 will be continued as dissertation in 4th Semester.

The award of sessional grades out of A, A (-), B, B(-), C, C(-), D & F will be done by an internal Committee constituted by the Head of the Deptt. This assessment shall be based on presentation (s), report, etc. before this committee. In case a student scores 'F' –grade in the sessional, failing which he/she will not be allowed to submit the dissertation.

At the end of the semester, every student will be required to submit three bound copies of his/her Master's dissertation of the office of the concerned Department. Out of these, one copy will be kept for department record & one copy shall be for the supervisor. A copy of the dissertation will be sent to the external examiner by mail by the concerned department, after his/her appointment and intimation from the university. Dissertation will be evaluated by a committee of examiners consisting of the Head of the Department, dissertation supervisor(s) and one external examiner. There shall be no requirement of a separate evaluation report on the Master Dissertation from the external examiner.

The external examiner shall be appointed by the University from a panel of examiners submitted by the respective Head of Deptt., to the Chairman, Board of Studies. In case the external examiner so appointed by the University does not turn up, the Director/ Principal of the concerned college, on the recommendation of the concerned Head of the Deptt. Shall be authorized, on behalf of the University., to appointed an external examiner from some other institution.

The student will defend his/her dissertation through presentation before this committee and the committee will award one of the grades out of A, A(-), B, B(-), C, C(-), D & F. A Student scoring 'F' grade in the exam shall have to resubmit his/her Dissertation after making all correction / improvements and this dissertation shall be evaluated as above.

Note: The Scheme of awarding the Grades to the student in the course will be supplied by the University to the examiner(s).

M.D.UNIVERSITY, ROHTAK (HARYANA)**Scheme of Grading System (I to IV Semesters)****Master of Engg. (M.E.) Degree Course****in Electronics & Communication.**

The grade awarded to a student in any particular course will be based on his/ her performance in class work, attendance, seasonal tests, tutorial tests, home assignments, laboratory work, viva-voce examination, main examination, etc.

75. The letter grades that can be awarded & their equivalent grade point are listed below: -

Grade	Grade Points	Description of Performance
A	10	Outstanding
A(-)	9	Excellent
B	8	Very Good
B(-)	7	Good
C	6	Average
C(-)	5	Below Average
D	4	Marginal
F	0	Very poor

The Grade Point Average (GPA) for Semester Grade Point Average (SGPA) or Cumulative Grade Point Average (CGPA) will be calculated as follows: -

$$\Sigma (\text{Number of Credits} \times \text{Grade Points})$$

$$\text{GPA} = \frac{\text{-----}}{\Sigma (\text{Number of Credits})}$$

Where Σ implies summation of the bracketed terms.

A student who is awarded 'F' grade in a course shall be required to repeat this course & his/her GPA will be recomputed with the fresh grade point obtained. To convert the percentage of mark into the relative Grade Point, following guidelines may be followed:

1. All students pursuing a particular M.E. course in all the Engineering Colleges affiliated with the M.D. University, Rohtak will form a single group. The answer book of this group will be examined by the same examiner in a particular subject to maintain uniformity of awards.
2. As a Grading System is the relative one, the Grades will be so awarded that their distribution follows the Normal Distribution Curve. However, the 'A' grade may not be awarded in case the absolute marks scored are less than 90 %.
3. While awarding any of the above grades, fractional percentage equal to or more than 0.5% will be rounded off to 1.0 % while that less than 0.5% shall be treated as 0.0%.
4. In case a candidate with 'F' grade reappears & improves his/her grade in subsequent exam(s), He/she will be awarded the Grade one level lower than the Grade he/she had actually obtained. For example, if a student obtains B(-) grade in a course in the 2nd attempt as per the above guidelines, he/she will be finally awarded 'C' grade. Therefore, the Grade Point corresponding to 'C' grade shall be applicable in the SGPA/CGPA calculation by the University.
5. If a students fails to attend the regular classes of a semester or he/she fails to appear the semester examination in any one or more subjects for any reasons, he/she shall be required to repeat that semester or course (s) next time in regular semester.
